## DETAILED ACTION

### *Election/Restrictions*

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1, 3, 5-11, drawn to a special technical feature of a method for amplification of a nucleic acid sequence containing a sequence motif 5'-GAAA-3' by real-time amplification in a presence of a probe containing a sequence motif 5'-CUGANGA-3'.

Group II, claim(s) 2, 4, drawn to a special technical feature of a method for amplification of a nucleic acid sequence containing a sequence motif 5'-CUGANGA-3' by real-time amplification in a presence of a probe containing a sequence motif 5'-GAAA-3'.

Group III, claim(s) 12-15, drawn to a special technical feature of a method for detection of bacterial pathogens by bringing a sample into contact with a probe containing the sequence motif 5'-CUGANGA-3'.

Group IV, claim(s) 16-29, drawn to a special technical feature of a kit for carrying out the methods of claims 1-4 and 12.

2. The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Asher et al. (WO 96/27026) teach a kit for use with claim 20 (claim 25). The kit would require two oligonucleotide primers, a DNA polymerase and a ribozyme probe (page 24, lines 19-29; page 25, lines 1-19; Fig. 6). The ribozyme probe contains a sequence motif 5'-CUGAUGA-3' (page 45, lines 25-27) and can be labeled with a reporter and a quencher (page 22, lines 12-25).

3. A telephone call was made to Astrid Spain on June 10, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 1637

4. The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and a product claim is subsequently found allowable, withdrawn process claims that depend from or otherwise include all the limitations of the allowable product claim will be rejoined in accordance with the provisions of MPEP § 821.04. **Process claims that depend from or otherwise include all the limitations of the patentable product** will be entered as a matter of right if the amendment is presented prior to final rejection or allowance, whichever is earlier. Amendments submitted after final rejection are governed by 37 CFR 1.116; amendments submitted after allowance are governed by 37 CFR 1.312.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103, and 112. Until an elected product claim is found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowed product claim will not be rejoined. See "Guidance on Treatment of Product and Process Claims in light of *In re Ochiai*, *In re Brouwer* and 35 U.S.C. § 103(b)," 1184 O.G. 86 (March 26, 1996). Additionally, in order to retain the right to rejoinder in accordance with the above policy, Applicant is advised that the process claims should be amended during prosecution either to maintain dependency on the product claims or to otherwise include the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.**

Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.
